## Scald Protection Valve

## Stainless Steel

| Model Code $\quad 1 / 2^{\prime \prime}$ | WSPV-12-N |  |  |
| :--- | :--- | :---: | :---: |
| $3 / 4^{\prime \prime}$ |  |  | WSPV-13-N |
| Sizes | $1 / 2^{\prime \prime}, 3 / 4^{\prime \prime}$ |  |  |
| Connections | NPT |  |  |
| Body Material | Stainless Steel |  |  |
| PMO Max. Operating Pressure | $\mathbf{2 0 0}$ PSIG |  |  |
| TMO Max. Operating Temperature | $\mathbf{3 0 0 ^ { \circ }} \mathbf{}$ |  |  |

## Typical Applications

The WSPV is used to protect personnel from accidental scalding by over-heated water or other liquids. Installations such as eye-wash stations and safety showers can become over-heated by piping exposed to solar radiation or a heat exchanger malfunction.

## How It Works

When water temperature rises above $95^{\circ}$ F, the thermal actuator modulates the valve open. If the water exceeds $105^{\circ} \mathrm{F}$, the valve will go to full open position in order to discharge the over-heated water. When the water temperature returns to $95^{\circ} \mathrm{F}$, the thermal actuator modulates the valve to close.

## Features

```
- Corrosion resistant stainless steel body
```

- Long service life
- Narrow temperature band
- System pressures will not affect opening temperature

## Sample Specification

The scald protection valve shall have a stainless steel body and be actuated by a thermal element that senses water temperature. The unit shall feature a ram-type plug for reliable and tight shut-off.

## Installation

Unit should be installed in a vertical orientation with flow direction downward. For full details, see Installation and Maintenance Manual.

| MATERIALS |  |
| :--- | :--- |
| Body | Stainless Steel, 303 |
| Seat Seal | PTFE |
| Plug | Stainless Steel |
| Spring | Stainless Steel, 302 |
| Thermal Actuator | Stainless Steel |

Valve
